

Debrief

20 students finished. 28% of the 18 assessed students showed it.

1 · OPEN WITH THE DISAGREEMENT

“You put Avery in 3 different places and the plans all worked. What was each one buying?”

7 chose Gym District Sublet, 6 chose Teammate Share, 7 chose Cousin’s Spare Room.

“The clinics paid real money and cost real hours. When is that a good trade and when is it not?”

8 took them, 9 did not.

“When the money got tight, you did not all cut the same thing first. What does that say about what you were protecting?”

2 cut sports-media course first, 2 cut backup money first, 13 cut rides and rest first.

2 · PUT TWO REAL PLANS SIDE BY SIDE

PLAN 1

Cousin's Spare Room

Course seat	Reserved early
Saturdays	Coached the clinics
Counted the bonus	No
Sports-media course	\$0
Backup money	\$750
Rides and rest	\$750

Lost the bonus in Week 6. Course paid. Ends holding \$750.

Evidence not all in

PLAN 2

Gym District Sublet

Course seat	Waited
Saturdays	Kept them
Counted the bonus	No
Sports-media course	\$600
Backup money	\$300
Rides and rest	\$0

Made every session. \$600 short of the course. Ends holding \$1,100.

Showed it

WHAT THESE WORDS MEAN

Showed it — Showed every part the work had to show, with no hint.

Evidence not all in — Some of it has no judgement yet — usually because nobody has read the writing.

3 • WHAT CHANGED WHEN IT WENT WRONG

After Week 5

- **2 of 20** cut **sports-media course** first — seats 7, 13
- **2 of 20** cut **backup money** first — seats 2, 19
- **13 of 20** cut **rides and rest** first — seats 1, 3, 5, 6, 8, 9, 11, 12, 14, 15, 17, 18, 20
- **0 of 20** backup money absorbed a loss.
- **0 of 20** finished with something uncovered.
- **0 of 20** landed a plan they never changed.

4 • WHAT TO REVIEW

8 of 18 assessed students did not show “savings is a planned amount”. A further 1 were never asked it.

Set the savings figure before anything else. A student writes a savings amount down first, then builds the rest of the plan around it.

1. Show two plans that balance at the same total — one where savings was set first, one where it took what was left. Ask which student is more likely to hit the goal.
2. Give one income and one list of costs. Everyone writes the savings line before touching any other line.
3. Change one cost by a small amount and ask what has to move. The savings line is the one that must not.

About 12 minutes.

5 • THE EXPLANATIONS YOU CHOSE TO SHARE

My mom lost her job last year so I know what it is like when money goes away. I left \$400 spare and it saved me.

Plan A

idk i just put the money where it fit and hoped. my mom says budgets are dumb anyway lol The numbers I stood on are \$5,500 and \$150.

Plan B
