

Debrief

11 students finished. 73% of the 11 assessed students showed it.

1 • OPEN WITH THE DISAGREEMENT

“You put Avery in 3 different places and the plans all worked. What was each one buying?”

1 chose Gym District Sublet, 3 chose Teammate Share, 7 chose Cousin’s Spare Room.

“The clinics paid real money and cost real hours. When is that a good trade and when is it not?”

4 took them, 7 did not.

“When the money got tight, you did not all cut the same thing first. What does that say about what you were protecting?”

5 cut sports-media course first, 3 cut backup money first, 3 cut rides and rest first.

“Some plans absorbed the lost bonus and some did not. What was different about the ones that survived it?”

1 covered it from backup money; 1 finished short.

“Counting the bonus gave you more to work with and one more thing that had to go right. Was that worth it?”

4 kept counting it, 7 planned without it.

2 · PUT TWO REAL PLANS SIDE BY SIDE

SEAT 4

Gym District Sublet

Course seat	Waited
Saturdays	Kept them
Counted the bonus	Yes
Sports-media course	\$1,200
Backup money	\$250
Rides and rest	\$250

Made every session. Course paid. Ends holding \$250.

Not yet · Fits the choice to the money there is — Part of it

SEAT 5

Cousin's Spare Room

Course seat	Reserved early
Saturdays	Coached the clinics
Counted the bonus	No
Sports-media course	\$0
Backup money	\$750
Rides and rest	\$750

Lost the bonus in Week 6. Course paid. Ends holding \$750.

Showed it

WHAT THESE WORDS MEAN

Showed it — Showed every part the work had to show, with no hint.

Not yet — At least one part was not shown.

3 · WHAT CHANGED WHEN IT WENT WRONG

After Week 5

- **5 of 11** cut **sports-media course** first — seats 1, 2, 5, 8, 11
 - **3 of 11** cut **backup money** first — seats 3, 4, 13
 - **3 of 11** cut **rides and rest** first — seats 9, 10, 12
 - **1 of 11** backup money absorbed a loss.
 - **1 of 11** finished with something uncovered.
 - **0 of 11** landed a plan they never changed.
-

4 · WHAT TO REVIEW

3 of 11 assessed students did not show “explains the trade-off made”.

BOW names no misconception behind this one, so there is no reteach to hand you. What the work had to show is: names something given up, says what it was given up for, and refers to at least one of their own numbers.

5 · READ THESE EXPLANATIONS ALOUD

I left both bonuses out of the first plan because Avery cannot spend money that might not arrive, and the reserve is what a plan is for. That is why Week 5 did not break me: the extra rent came out of the backup money I had already set aside, and the course seat was paid at Week 4 so nobody could take it back. I kept the Saturdays free because the clinics would have cost Avery rest before the showcase and the money was not the thing that was short. The numbers I stood on are \$5,000 and \$550.

Ana R.

I counted both bonuses at the start because the plan would not reach the course without them, and I knew that was the risk I was taking. When Week 5 took the showcase money I had to give up nearly all of the flexible cash and take the clinics to cover the rehab bills. If I planned it again I would build on the money Avery can count on first and treat a bonus as extra rather than as income. The numbers I stood on are \$6,300 and \$1,150.

Devon P.

I put most of the money on the course because that is the thing Avery actually wants and the rest can wait. My backup plan was short but I saved it anyway because I did not want to take money off the course. Week 5 was hard and I had to move money out of rides. The numbers I stood on are \$6,300 and \$1,200.

Leila H.

i put the money on the course. it worked out fine i think. the rent went up but whatever. idk what else to say here. The numbers I stood on are \$5,800 and \$1,200.
